Why Work with x-RD?

Solve New Challenges

x-RD bring subject matter expertise in software development, cyber security and applied AI/ML solutions.

We currently provide all the software developers, AI/ML data engineers and scientists for several Australian Defence projects. x-RD develops proof of concept solutions via an agile development manner.

As a DISP and veteran-owned Australian small business, we meet many local content requirements demanded by Government procurement.

Improve Productivity

Working with x-RD helps your team be productive from the first day rather than waiting months to design and deliver secure environments

Scarce technology resources can focus on value adding software development rather than IT infrastructure

Rather than commit to large upfront capex costs customers can control their spend and scale as needed

Improve collaboration across teams businesses and security classifications

Lower Risks

Take advantage of x-RD's team that are specialists in cyber security, a business that is DISP compliant and technologists who are AGSVA cleared

All of our products are secure, sovereign and automated

Our products abide by cyber security controls included in IRAP, Essential 8, SOC2, HIPAA, APRA, ISO27000 standards

How to Work with x-RD
