

Services

We custom-build Mobile Apps, Web Systems and other state-of-the-art software solutions.

◆ Digitise paperwork

- Develop a solution to reduce paperwork by upto 80%.
- Our App to digitise flight manuals saved the **Air Force** countless working hours.
- Automate auditing and stock-taking to eradicate errors and save hundreds of hours of manual work.

◆ Data Visualization and Reporting

- Cut time by upto 90% by automating Excel data and reporting. Do it with a click of a button.
- Automate reporting and emails.

◆ Fast track emerging technology adaptation

- Computer Vision and AI detection technologies being used for the Army(**AASAM**) target-scoring App.

◆ Staff Training, Assessment and Maintenance Platforms

- Simplify training through an in-house training management system with AR capabilities to automate the learning and assessment experience.
- Developed an AR training App for the **ATO**.

◆ Proof of Concept in 30 Days

- A working Proof of Concept to demonstrate the capabilities and effectiveness of applications.
- Our innovative Proof of Concept workshop got results within 30 days for the **Australian Army**.

Key Customers

◆ Australian Army

- AASAM (Australian Army Skill at Arms Meet) Project that uses Computer Vision technology.
- Marksmanship Scoring Application which automatically detects the fall of shot and calculates the score using Computer Vision and AI.

◆ Australian Air Force

- Digitised Flight Manuals.
- Single platform for storage, management, and access to regulatory aviation information.
- Reducing hundreds of hours of manual searching and filling of information.

◆ Australian Taxation Office

- Transformed the training system, by developing an AR App that made training interactive and easy to follow.

◆ Deloitte

- Warehouse management tool for stock control and tracking.
- Barcode scanner - handheld scanning device integrated with a mobile application.

◆ Cummins

- Stock check and finding vehicle parts using the Cummins PowerApp.

◆ Ernst & Young | ASB Bank

- A revolutionary AR learning platform.

Capability

We're Specialists In

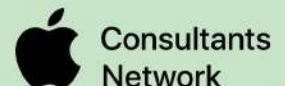

- Custom iPhone and Android App development and deployment.
- Emerging technologies, including Artificial Intelligence (AI), Machine Learning (ML), Augmented Reality (AR) and Computer Vision.
- Software Engineering, including custom and scalable web applications.
- Tech Project consulting for needs discovery and Proof of Concept delivery.
- Process automation with complex systems to expand enterprise efficiency.
- Software support and maintenance.

Our Values

- Award-winning Melbourne-based team that has 12+ years of industry experience.
- 60+ strong technical team that has successfully delivered 1,000+ projects.
- Agile approach ensures high value for money and quick turnaround.

Quality Standards & Accreditations

- ◆ ISO 9001:2015 Certified Software Company.
- ◆ Member of Apple Consultants Network.
- ◆ Member of Microsoft Partner Network.
- ◆ Member of AIDN.

DIGITAL SOLUTIONS THAT TRANSFORM THE AUSTRALIAN DEPARTMENT OF DEFENCE

We are an Australian Software company with proven experience in digitising processes through the use of state-of-the-art technology.

Our mission is to make the Australian Department of Defence a world leader in technology adoption.

We've worked with

Who we are

We are a Melbourne-based technology company with an Award-winning team. We have helped the Department of Defence, ATO, and other government organisations adopt innovative technology solutions, and we are here once again to help you shape your department's future with ongoing innovation.

Awards we've won
