

## CAPABILITIES

High precision Multi Axis CNC Machining

High Quality Die Mold Machining

Prototype to Production

Project Management Services & Support

FAI and In Process Inspection

Complex Component Machining and Assembly

Documented material control and traceability

## ACCREDITATIONS & CERTIFICATION

- ISO9001:2015
- AS9100:D
- Proshop ERP and QMS system
- Commitment to 5S Manufacturing
- Defence industry Support Program – (undertaking)

## OUR VISION

“Is to Revolutionize Precision Engineering and be renowned for our Quality Components in the Manufacturing Industry.”

## OUR MISSION

“Is to consistently deliver superior Quality and Precision Engineering solutions that exceed expectations and meet the highest level of industry standards.”

## DISCRIMINATORS

ISO9001 and AS9100 Certified

100% Australian Owned

Complex Machining Specialist Defence Experience

Rapid Prototyping

Automated CNC Machining Robot Cell

Strong and Reliable Network of Industry Partners

## CLIENTS AND PARTNERSHIPS

**SYPAQ**

**ECLIPS**  
inventive engineering

**UAMTEC**

**Sc Supacat**

# DEFENCE

SPECIALIST IN ENGINEERING  
AND ADVANCED MANUFACTURING

## ABOUT US

Axistek is a Melbourne, Australia based Advanced Manufacturing Company that provides its extensive range of goods and services throughout Australia.

We deliver innovative engineering solutions that drive progress, empower industries, and shape a sustainable future. Axistek is committed to leveraging our expertise, cutting-edge technologies, and collaborative approach to exceed client expectations, optimize operational efficiency, and foster meaningful impact on a global scale.

# OUR QUALITY

Axistek is a technology focused company driven by a paperless ERP and QMS system meeting AS9100 and ISO 9001:2015 requirements, We are continually improving our processes and investing in quality technology and equipment.

# OUR EXPERIENCE

Axistek has been involved with many Engineering projects across different sectors including:

- Defence
- Aerospace
- Land
- Mining
- Maritime
- Medical
- Industrial
- Energy

# OUR CAPABILITIES

**Axistek offers a wide range of Engineering Services:**

- Automated High Volume Robot Cell
- Precision Machining
- CNC machining 3,4 and 5 Axis
- CNC Turning
- Die and Mold Manufacture
- Complex Prototyping
- High Volume Production
- Tooling Design and Design Support
- Research and Development
- CNC Wire EDM / EDM Spark Eroding
- Surface grinding
- Quality Room – Measurement CMM
- Fabrication
- Project Management
- On-site Maintenance
- Machinery Overhaul
- Part Assembly
- Complex Sub-Assembly

# OUR MISSION

Our Mission is to consistently deliver superior Quality and Precision Engineering solutions that exceed expectations and meet the highest level of industry standards.

Our vision is to Revolutionize Precision Engineering and be renowned for our Quality Components in the Manufacturing Industry
