## COMPANY OVERVIEW

MISCO Australia supplies advanced insulation and CNC-machined components for defence, aerospace, and industry.

- » Experts in insulation for power, comms & mobility platforms
- » UAV & high-performance thermal protection
- » Fast turnaround for urgent and classified work
- » Defence-ready, scalable, and SME-partner aligned

## PURPOSE

MISCO Australia delivers advanced insulation solutions to improve safety and extend the life of defence, aerospace, and energy systems. Our materials meet strict standards, protect sensitive components in extreme conditions, and support clients with tailored, mission-critical solutions.

## CAPABILITIES

Our capabilities combine material expertise, precision machining, and custom engineering to deliver reliable components built to perform when it matters most.

- » Material Supply: G10/G11, polycarbonate, PVC, phenolics, heat shrink
- » CNC Machining: Precision milling, routing, and sawing
- » Engineering Support: Design input and prototyping
- » Defence Grade: MIL-spec, IEC, UL-compliant materials

## WHY US

Clients choose MISCO Australia for our specialised focus, defence-ready quality, and responsive service—backed by local ownership and industry experience.

- » Specialists: Matching the right materials to your needs
- » Precision: In-house production = speed & quality
- » Defence-Ready: Compliant and agile
- » Responsive: Fast quotes, clear communication
- » Australian Owned: Local, trusted, and experienced
