OUR DISCRIMINATORS

Complete development capability.

PI offers end-to-end design and engineering capabilities needed to create, commercialise and manufacture sophisticated, connected products.

Regulated product specialists.

We specialise in developing regulated products and hi-tech connected devices. We excel at exploiting the technology convergence between sectors.

Commercially focused.

Our goal is to help create a commercially successful product that solves a real customer problem, not just meets a technical specification.

Flexible.

Our flexible approach to product development means clients can take advantage of our end-to-end service or draw on individual skillsets as needed.

Innovative.

We bring entrepreneurial thinking and a structured approach to innovation that ensures we develop innovative and impactful solutions.

QUALITY STANDARDS

Mature quality systems.

PI manufactures high quality, FDA regulated products under mature, audited quality systems. Our facilities are ISO 13485:2016 & ISO 9001 certified.

KEY CLIENTS

Trusted relationships.

Our clients and partners include some of the world's top companies. Here is a sample.
